Dear Doctor Lederberg:

I have obtained permission from your published to use your excellent article "Sex in Bacteria" taken from the book Sex in Microorganisms in my genetics course at Goucher this year. Instead of using a text book, I am having a series of original articles mimeographed. In case you have a reprint of the article I should very much like to obtain a copy. Also, allow me to thank you for the reprints you have sent me in the past and also to say how very much I admire your beautiful studies and the clear manner in which you write them up for publication.

Sincerely yours,

John C. Brown
